RULES AND REGULATIONS

2015-16 College/University Flu Vaccination Challenge: Rules and Regulations August 2015

Challenge Overview

The purpose of the challenge is to increase flu vaccination rates of college-aged young adults through a friendly competition amongst participating colleges and universities in Michigan. Students will be asked to self-report their vaccination status via an online collection tool. The institutions with the highest flu vaccination coverage percent (based on undergraduate student population) will be presented with a trophy from the Michigan Department of Health and Human Services (MDHHS) and Alana's Foundation.

Student Self-Report Vaccination Survey

The survey link for students to report their vaccination status is <https://www.surveymonkey.com/r/CFC1516>. Students will be asked to report school name, month of vaccination, place where flu vaccine was received, and age. No identifying information will be collected. Multiple responses can be submitted per computer (there will be no limit to responses per IP address) as it is recognized that students often use communal computers. Because no identifying information will be collected, MDHHS will be utilizing the "honor system."

Beyond collecting data, one of the purposes of the self-report vaccination survey is to raise awareness of flu vaccination among students and get students talking about flu vaccine. Therefore, college health centers are not permitted to enter data into the survey for the students. Student health centers should encourage all students vaccinated at their facility to take the challenge and can offer a computer on-site to take the survey. However, health center staff should not be filling out the survey for students.

The survey link will remain live through the last week of March. Flu vaccines given between August and the end of March will be counted. All four questions on the survey must be answered in order to be counted.

Three traveling Alana Yaksich Memorial Trophies will be given to the overall challenge winners for small, medium, and large-sized institutions.

College & University Flu Vaccination Challenge

How does your university stack up?

Join us in a friendly competition this fall and winter. MDHHS is teaming up with colleges and universities to challenge students to get vaccinated against the flu.

By participating in this challenge, your institution will receive access to educational resources and programs, an award of participation, and a chance to win free registration to state immunization conferences. MDHHS will recognize high-performing schools with awards of excellence and announce the results via press release and social media channels.

Ensure your students are in class and ready to learn. Join us to plan a successful vaccination campaign at your institution!

Are you part of the challenge?

Enrolled Schools in 2015-16 Flu Challenge:

- Albion College
- Alma College
- Aquinas College
- Calvin College
- Eastern Michigan University
- Ferris State University
- Grand Valley State University
- Hope College
- Kalamazoo College
- Michigan State University
- Muskegon Community College
- Oakland University
- Rochester College
- Southwestern Michigan College
- University of Michigan
- Wayne State University

ELECTRONIC MATERIALS AVAILABLE

2015-16 Flu Season

College and University Flu Vaccination Toolkit

ARE YOUR STUDENTS PROTECTED?

The Michigan Department of Health and Human Services (MDHHS) and the Centers for Disease Control and Prevention (CDC) encourage college health centers, medical practices, health departments, pharmacists, and other immunization providers to routinely assess the vaccine needs of their young adult patients and make a strong recommendations for vaccination. You are in a unique position to help spread the word about recommended vaccines for college-age students, and MDHHS would like your help. The materials in this toolkit will assist you in promoting the importance of annual flu vaccination to students.

According to data from the Michigan Care Improvement Registry (MCIR), coverage levels among individuals 18-24 years of age are very low – only 10.8% during the 2014-15 flu season.

College/university students are at a unique risk of contracting the flu due to lifestyle factors. Close contact such as dorms, classrooms, public transportation, parties, and sports events make flu especially easy to spread at college. Further, lack of sleep, not eating healthy, and not exercising regularly can weaken the immune system, making these young adults more vulnerable to the flu.

While reaching the college/university student population with important health messages can be difficult to do, it's critical that we protect them from the flu. MDHHS would like to challenge you to ramp up your flu vaccination efforts this season!

Please utilize these materials to drive demand for flu vaccine at your campus today! If you have any questions about this toolkit, contact Courtney Londo, Adolescent and Adult Immunization Coordinator, at londoci@michigan.gov or Stefanie DeVita, Influenza Epidemiologist, at devitas@michigan.gov.

ARE YOU PART OF THE CHALLENGE?

Join us in a friendly competition this fall. MDHHS and Alana's Foundation are teaming up with colleges and universities to challenge students to get vaccinated against the flu.

By participating in the [2015-16 Flu Vaccination Challenge](#), your institution will receive access to educational resources and programs, an award of participation, and a chance to win free registration to state immunization conferences. MDHHS will recognize high-performing schools with awards of excellence and announce the results via press release and social media channels.

Find out more at www.michigan.gov/flu (click on "College and University Flu Vax Challenge").

*Reporting of adult immunization data into MCIR is strongly recommended and is considered an immunization best practice. Adult immunization coverage levels may be under-reported in MCIR due to lack of reporting.

Why get a flu vaccine?

Ask Niko Yaksich of Michigan.

Even healthy people can get the flu and it can be very serious. This year and every year, get vaccinated against the flu.

Niko's story

In 2003, I lost my sister Alana to the flu. She was a perfectly healthy young woman. The day that she passed away, I was a little under the weather, but by the end of the day, I was around with me. It was as though she had never been to normal though. As I slept that night, my sister was gone. The doctors said that there was nothing wrong with her brain. By the following night I had lost my sister.

www.michigan.gov/flu

Concept designed with

Why get a flu vaccine?

Ask the McCormick family of Michigan.

Even healthy, young adults can get the flu, and it can be very serious. This year and every year, get vaccinated against the flu. It could save a life.

Ashley's story

Ashley McCormick was a 23-year-old nanny. She came home from work one day with a high fever and went to urgent care. Her positive flu test result was a relief, but on Christmas Eve, she quickly became very sick. Ashley's life was in danger.

FLU AND YOU

— KNOW YOUR RISKS —

Find vaccines near you: vaccine.healthmap.org

GET VACCINATED TODAY!

GETTING SICK SUCKS

Most people who get the flu are sick for over a week. That's more than 7 days without class, social functions, and even work. You simply can't afford to get sick.

IT CAN HAPPEN TO YOU

Lack of sleep, not eating healthy, and not exercising regularly weakens your immune system, making you vulnerable to flu. Your lifestyle puts you at a unique risk.

YOU CAN AFFORD TO GET VACCINATED

Most insurance plans cover the cost of flu vaccine. You can get vaccinated at your primary care provider, local pharmacy, student health center, or local health department. For those who are not covered, it is worth the cost.

FLU IS EASILY SPREAD

Close contact such as dorms, classrooms, public transportation, parties, and sports events make flu easy to spread at college.

FLU IS SERIOUS

Even healthy people get the flu and it can be very serious. Flu is not the common cold. Every year, healthy young adults become severely sick and some even die from the flu.

VACCINE: THE BEST PREVENTION

The single best way to prevent the flu is to get vaccinated every year. While other preventative measures (such as hand washing) are important, the flu vaccine is your best bet.

Contact Your University Health Center or Healthcare Provider Today!

KNOW YOUR RISK • KNOW THE FACTS • GET VACCINATED

There are other vaccines you may need to stay healthy, including HPV, Meningococcal, and Tdap. For more information talk to your healthcare provider.

CHALLENGE KICK-OFF ON SEPTEMBER 8

MDHHS

MDHHS Kicks Off Second Annual College Flu Vaccination Challenge

Contact: Jennifer Smith 517-241-2112

For Immediate Release: September 8, 2015

LANSING, Mich. – College students can study harder and do better when they're healthy, and an important part of wellness is getting an annual flu vaccination.

The second annual College and University Flu Vaccination Challenge is a partnership between the Michigan Department of Health and Human Services and enrolled schools during the 2015-16 flu season. The challenge began in the 2014-15 season as a friendly competition between schools to see which could get the highest flu vaccination coverage on their campus.

"Flu vaccination remains the single best way to prevent getting the flu, and MDHHS is encouraging all Michigan colleges and universities to support flu vaccination among students. It can be a bit more fun when our campuses can challenge each other to exceed in this important public health effort," said Dr. Eden Wells, the department's chief medical executive. "Before the flu hits your campus, assess the needs of your students and strongly recommend the flu vaccine now and throughout the entire season."

College students have unique risk factors that make them more susceptible to getting sick, such as close contact in dormitories, classrooms, public transportation, parties, and sports events. But even healthy young adults can get influenza. According to Michigan Care Improvement Registry data, adults aged 18-24 years have the lowest flu vaccination coverage rate, only 10.8 percent during the 2014-15 flu season.

There are currently 15 schools enrolled in the [2015-16 College Flu Challenge](#). They are Albion College, Alma College, Aquinas College, Calvin College, Eastern Michigan University, Grand Valley State University, Hope College, Kalamazoo College, Michigan State University, Muskegon Community College, Oakland University, Rochester College, Southwestern Michigan College, University of Michigan, and Wayne State University.

Students from enrolled schools should self-report their flu vaccination via a short online survey at <https://www.surveymonkey.com/r/cfc1516>. This year's challenge runs from August 2015 through March 2016. The winning schools – one small, medium, and large – will be determined based on the student self-reported vaccinations and each school's undergraduate population.

MDHHS also continues to partner with [Alana's Foundation](#) for the College Flu Challenge. Alana's Foundation will award the winning schools with Alana Yaksich Memorial traveling trophies in Spring 2016.

For more information about the College Flu Challenge, visit the [2015-16 College Flu Challenge](#) website at www.michigan.gov/flu.

Campus Flu Challenge underway

Oakland University is partnering with the Michigan Department of Health and Human Services and other schools to compete in the **Campus Flu Challenge**.

This friendly competition among colleges around the state is tracking the number of college students who get immunized against influenza. Oakland University students can get a flu vaccine at the Graham Health Center on campus, from a family physician or at a local pharmacy and **report it here**. Each survey recorded earns credit for the school and competition winners will be announced later this year.

Move-In Flu Clinic:

To help roll out the Campus Flu Challenge, health providers at the **Graham Health Center** are introducing a Move-In Flu Clinic where students can stop by the Graham Health Center for a flu vaccine on Monday, Aug. 31, from 8 a.m. to 4:30 p.m.

Have questions? Call the Graham Health Center at (248) 370-2341.

From the Graham Health Center Director:

"This year's supply of flu vaccine has arrived in time for us to host a move-in flu clinic," said **Nancy Jansen, nurse practitioner, and director of the Graham Health Center**. "It's not too early, in fact it's a great time to stop by and get immunized. Getting a flu shot now will help our students stay ahead of the flu and have a healthy school year."

Walk-In Wednesdays:

In addition to the Move-In Flu Clinic, Graham Health Center will also be offering Walk-In Wednesdays beginning Wednesday, Sept. 9. The campus community can walk in from 8:30 to 11:30 a.m. or 2 to 4 p.m. to get the vaccine. No appointment necessary.

Why participate?:

Each year, many young adults in Michigan will get sick, miss class or even die from the flu. Last year, only about 10 percent of college age residents were vaccinated. Oakland University's leaders at the Graham Health Center know we can do better. A flu shot today may mean you don't have to visit the health center later this year.

SAMPLE FACEBOOK MESSAGES

- Healthy young adults CAN and DO get the flu each year! Get a flu vaccine today to stay healthy and help your school win Michigan's #mifluchallenge! Don't forget to fill out the survey at www.surveymonkey.com/r/CFC1516 when you do.
- Michigan colleges and universities are competing to beat the flu. Don't let your campus lose to the flu, get a flu vaccine today and when you do, make sure to snap a #mifluselfie!
- Did you get your flu vaccine yet? Show us your #mifluselfie and let's show @RIVALSCHOOL how protecting our campus is done! #mifluchallenge
- @SCHOOLNAME is participating in MDHHS' second annual #mifluchallenge! Did you get your flu vaccine yet? Tell us when you do and let's beat @RIVALSCHOOL!
- President NAME got their flu vaccine today! Now it's your turn, students. Are you up for the #mifluchallenge? Get your flu vaccine, post a #mifluselfie, and take the survey at www.surveymonkey.com/r/CFC1516 to help us beat our instate rivals! (post picture)

SAMPLE TWITTER MESSAGES

- Will your Michigan college win the #mifluchallenge? Let us know when you got your flu vaccine at <https://www.surveymonkey.com/r/CFC1516>!

Approved Health System—Adding Sites and EPs

- [Adding Additional Eligible Professionals to the MCIR HL7 Transmission for Approved Health Systems](#)
- [Adding Additional Sites to the MCIR HL7 Transmission for Approved Health Systems](#)

REGISTRATION

- Complete the registration at Michigan Public Health and Meaningful Use Testing Registration
- <https://mimu.michiganhealthit.org>
- Upon completion of the registration and validation by the MCIR staff, you will receive an email confirming registration and outlining the next steps in the process.

ONBOARDING

1. Review the MCIR Specification Guide.
1. Choose an HIE to transport the HL7 message.
1. Connect with the HIE and follow their testing process.

DATA QUALITY REVIEW

- Once a HIE is selected and connectivity is established, MCIR staff will work directly with you and/or EHR Vendor until you are approved to submit or query immunizations in MCIR.
- Before a go-live and training date can be set up, you must complete the MCIR Provider Site Responsibilities & Contact Information Form.

SUCCESSFUL HL7 REPORTING

The most important step is after you are sending vaccines to MCIR through HL7 it is very important to run the Electronic Submission Summary Report on a weekly basis to manage a high level of data quality reporting to MCIR.

Questions regarding the message format can be sent to: MCIRHELP (MU_MCIRHELP@mphi.org).
